OIL LINE UPGRADES

Did you know oil moves through a feed line from your storage tank to your heater? If this oil feed line is encased in a concrete basement floor and isn't coated in a material like plastic, the line may degrade over time. For a quick and easy fix that can help avert an oil spill, call us at (781) 878-5050.

BIOHEAT® FUEL

We at Albert Culver are pleased to provide fast on-call Bioheat® fuel delivery to each and every one of our valued customers. Bioheat® fuel is a blend of heating oil with biodiesel, sustainably made from renewable resources like soybean oil. It produces fewer emissions than traditional fuel.

BUDGET PLAN

Even the most cost-effective energy sources can cause financial strain. The EasyPay Budget Plan divides your estimated annual heating bill into 12 smaller monthly payments! Call our office to sign up for free.

SERVICE PLANS

Another easy way to stay on top of your winter heating bills is to sign up for one of our oil heating service plans. These plans include parts and service to keep your equipment maintained and your costs more predictable. Visit us online to learn more.

PAY ONLINE

Need to pay your bill? We make it simple, with an online option to make your payment. Go to AlbertCulver.com/online-payment to save time and effort!

Time for Spring Cleaning!

Your furnace or boiler has worked hard for you all winter—don't forget to call or go online today and arrange your regular spring heating system cleaning.

Dear Valued Customer,

Albert Culver has seen many seasons come and go since we opened our business in 1860, but we're always glad to welcome spring to the South Shore. Spring brings warmer temperatures, longer days, and home improvement projects.

If a new heating system is on your list, consider the high-efficiency Energy Kinetics® System 2000®. This advanced oil heating solution has extremely quiet operation and low emissions to keep your home warmer and your energy bills lower all winter!

Or, if you're planning ahead for summer, we install top-quality ductless mini-split air conditioning and full-home central air systems. Mini-splits are small, ductless systems that offer precise zoning for energy-efficient cooling. Central air A/C systems provide quiet, even cooling for your home, and we can easily integrate the ductwork with your heating system. No matter which system you choose, upgrading can reduce your cooling costs and give you peace of mind.

Albert Culver is pleased to count you among the South Shore, Massachusetts residents who trust us to provide their HVAC service and fuel delivery. As a local company with five generations of experience, your satisfaction will always be our top priority. Please get in touch with us if we can assist you.

Sincerely,

Albert Culver

HOW DID YOUR HEATING SYSTEM HOLD UP LAST WINTER?

If you have an older system, it may be time to consider a replacement. Your home will be more comfortable next winter, and you'll also enjoy other benefits:

- Annual energy-cost savings
- Longer equipment lifespan
- Improved efficiency and safety
- Lower emissions
- Reduced risk of breakdowns
- Increase home value

When it's time for an upgrade, Albert Culver is happy to provide a free consultation!

Talk to our experts today about boilers, furnaces, and the advanced Energy Kinetics® System 2000®.

STAY COOL THIS SUMMER WITH A NEW A/C SYSTEM

If you're thinking about installing a new air conditioning system this year, now's the time! Our central A/C systems and ductless air conditioning can lower your energy bill while keeping you cool and comfortable. Here are some benefits to consider for each system:

DUCTLESS MINI-SPLIT A/C

- Compact and ductless
- Zoning for room-by-room cooling
- Quiet and effective

Both systems will keep you cool this summer for a reasonable price. If your heating system is forced hot air with partial or full ductwork, a whole home central air conditioning system may be best for your home.

CENTRAL A/C

- Complete, even cooling throughout your home
- Works with your heating system's ductwork
- Compatible with programmable thermostats

Call (781) 878-5050 for a consultation to learn more about our energy-efficient cooling equipment or request an estimate today!
